

S1801EC FWT

Maximize wireless performance with the Transense self-developed and launched S1801 Series Fixed Wireless Terminal (FWT). Take advantage of the established worldwide availability of CDMA Systems for all of customers' communications requirements, including digital voice, which can provide access to home, office or any remote location where phone service is needed and GSM/CDMA wireless networks are available. At the same time, FWT can provide polarity reversal signal to connect meter for charge, so it can act as wireless payphone.
